Reading & WATCHING

The latest publications produced for vintage farm machinery enthusiasts are reviewed by the *Heritage Tractor* team

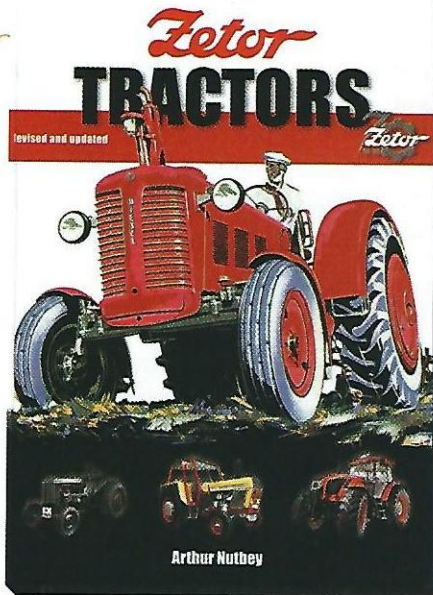

Chronicle of Zetor

ZETOR CELEBRATED ITS 70th anniversary last year and to mark the occasion Arthur Nutbey produced an updated version of his *Zetor Tractors* book, first published in 2009. His latest volume, *Zetor Tractors Revised & Updated*, contains extra pages and new chapters recording the changes and updates that have occurred to the tractor range during the past eight years.

The re-introduction of the Crystal name is covered as the story is brought right up to date. Packed with many wonderful archive images, this book also includes a chapter on Zetor

enthusiasts and the different types of brand memorabilia. Also featured is the new Zetor Gallery at the Brno factory, a must-see exhibition for many tractor fans.

The very clear text will please older readers, while the numerous specification panels make this title a very useful reference for enthusiasts of the Czech brand. Books on the history of Zetor are not plentiful and this title, which is sensibly priced, is surely the best out there.

Published by Consus Media (www.arthurnutbey.com). Price £19.95. Also available from Classic Tractors of Drifffield, East Yorkshire. Tel: 01377 270209.
